 <b>JOHN COTTINGHAM</b> <b>SUPERVISORY PATENT EXAMINER</b> <b>TECHNOLOGY CENTER 2100</b>			

In Applicant's remarks filed after the final rejection dated 11/6/2006, it is argued on page 6 that the prior art of Huras fails to teach 1) Determining that a change occurred to data in a first region of a first plurality of regions of a first volume and 2) The change resulted from a restore operation.

1) Determining that a change occurred to data in a first region of a first plurality of regions of a first volume as a log file that still represents changes made to a tablespace as a result of a transaction (at least [0021] and [0032]). 2) The change resulted from a restore operation is then taught as a log file representing changes made as a result of a transaction executed against the tablespace subsequent to the making of the backup version (end of [0020]).

Furthermore, it should be noted that the change history table 215 of Huras also determines changes made during a recovery (same as restoring) operation. In reference to at least figure 4 and paragraphs [0046]-[0054], the tablespace change history table 215 works with the log file in a way that records modifications of the tablespaces by the log records. In summary the Examiner kindly submits that the Huras reference still teaches elements 1) and 2) because in their teachings, changes to regions (i.e. table spaces) from a restore operation are determined.
